Task 2. Summarizing (6 points).

You are going to read a magazine article about cloning. Choose from the list A-H the sentence which best summarises each part (105-110) of the article. There is one extra sentence which you do not need to use. There is an example at the beginning (0). Mark your answers on the answer sheet.

- A It is currently extremely dangerous to attempt to clone a human.
- B The controversy is certain to continue.
- C It looked like human cloning was becoming a reality.
- D There could be numerous drawbacks to human cloning.
- E Most people do not understand what cloning really means.
- F Cloning is almost certain to continue because it can't be stopped.
- G According to scientists, the cloning of humans could have medical benefits.
- H The DNA of a cloned cell is identical to the DNA of another cell.

To clone or not to clone? That is the question.

Eileen Peters explores the issues behind the cloning controversy.

0	H
---	---

What exactly is cloning? According to the Human Genetics Advisory Commission, cloning is defined as 'producing a cell or organism with the same nuclear genome as another cell or organism'. Basically, that means that a clone is a living being with exactly the same DNA as another living being. At the time of writing, some mammals have successfully been cloned, but humans have not.

105	
-----	--

Although frogs were first successfully cloned in the 1950s, it was not until the mid-1990s that cloning became a major political issue. This was when Dolly the

sheep became the first successfully cloned adult mammal. Suddenly, it seemed that the cloning of humans had gone out of the realm of science fiction and was close to becoming scientific fact. Some people were extremely excited by this prospect. Others were extremely worried.

106	
------------	--

So, why are some scientists so keen to clone human cells? First of all, it's important to understand that cloning human cells does not necessarily mean that you make a new human being. Scientists believe that in the future we will be able to clone human organs such as the heart, liver and kidneys which we'll be able to use in transplant operations. They also think that cloning will help us get rid of genetic diseases and will allow infertile couples to have children.

107	
------------	--

However, most scientists are against human cloning at present because they argue it is not safe. It took 272 attempts before the cloning of Dolly, and even she did not enjoy good health. At present, we do not have the technology to safely clone humans. But what if we are able to solve the safety issues? Will human cloning be acceptable then? Many politicians and religious leaders say no.

108	
------------	--

There are both political and ethical arguments against human cloning. Some religious groups say that cloning would allow us to 'play God': to determine the sex, the eye colour, even the height of our children. They say this is morally wrong. Others argue that clones will suffer severe psychological problems when they learn they have been cloned, and may suffer prejudice and intolerance from non-cloned humans. Cloning could also produce a black market for embryos.

109	
------------	--

So what can we expect to happen in the future? Most Western governments are in the process of legislating against human cloning. However, unless all the countries of the world make human cloning illegal (which is highly unlikely), we are likely to see more and more attempts at human cloning in the near future. It is too early to say how successful they will be.

110	
------------	--

Whatever happens, one thing is sure. This issue is not going to go away. Scientists such as Severino Antinori and Panagiotis Zavos are not going to give up trying to develop safe human cloning techniques. And religious organisations such as the Roman Catholic Church will continue to argue that the cloning of humans is morally indefensible.

PART VI. Writing Issues (10 points)

Task 1. Writing an essay (10 points).

Choose one of the options and write your answer on the answer sheet. Beware of plagiarism! Add quotation marks. We use computer software designed to detect plagiarism. Type in (!) an essay on one of the topics (100-150 words):

- A. Nowadays many young people go to study foreign languages abroad. However, others think that it's better to learn them in their home country.
- B. Some people think that they can learn better by themselves than with a teacher. Others think that it is always better to have a teacher.
- C. Some people trust their first impressions about a person's character because they believe these judgments are generally correct. Other people do not judge a person's character quickly because they believe first impressions are often wrong. What is your opinion?

Use a plan:

- introduction (state the problem)
- express your opinion and give 2-3 reasons for your opinion
- express an opposing opinion and give 1-2 reasons for this opinion
- explain why you don't agree with the opposing opinion
- make a conclusion restating your position
