PART V

TASK 7

1. Land-based energy can potentially offer 6 times of its total electricity consumption.
2. Energy consumption of wind turbine consists of its production, installation, operation and decommission, which can be earned back in 3 month operation.
3. Modern turbine is quieter and has a couple of improvements such as blade design and predecessors.

4. The study shows that a number of birds and bats ~~is~~ killed with turbine is much lower comparing with human activities, such as traffics, hunting, power lines etc.
5. It is common perception that wind farms ~~eyebars~~ and that they are very noisy.
6. A large number of wind farms has ambitious goals such as government energy industry because of that more people are affected by this idea and want to insure such big goals to be accomplished.
7. Wind farm construction insures a good ecology of undeveloped locations.
8. Wind turbines require wide, straight and flat roads, large holes filled with steel and concrete, assembly, clearing of trees, transformers and power lines to secure each giant.
9. There also exists possible adverse which can cause dangerous situations, such as low-frequency vibration on aquatic life and navigation.
10. Some people complain that wind turbines kill birds and bats as they affect birds' migration paths especially by night, which is true according to the study statistics.

PART VI

TASK 8

Groan a bear, a man

Howl a wolf, a dog

Plop a frog while landing

Roar a lion, a tiger

Shriek glass while wind blows

Chime coins

Tap drops of water

6

PART VII

TASK 9

1. Produce products

2. Recycling plant — place where litter is remade in new materials

3. Affluent rich

4. Priorities most important work to do

5. Commute move systematically from one place to another

4
