She hated mushrooms. But, oh, well, how could she refuse?

An hour later Eliza was already scanning the wet ground in the forest. Her annoyance was bordering on indignance. "This is anything but adventure", she thought. Then, suddenly, she embarked on a mysteriously large tree with a dark hole in it. The curiosity lead Eliza to look inside it, then take a step in. It turned out there was a magical realm with a dazzling waterfall, miraculously fit into the tree! "Am I dreaming?" Eliza wondered, astonished. The girl was flooded with excitement and determination to explore, but she decided to tell her mother first. ~~She can~~

She can talk home and shared her discovery. The mother listened patiently, then asked, "So... Were there mushrooms?"

Task 3.

Just when demographers are ringing ~~to~~ alarm bells about overpopulation, amazing founder Jeff Bezos says we need to populate our solar system. Mr. Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1000 Mozarts and 1000 Einsteins... Space would be full of life and intelligence and energy". He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... So that ingenuity and imagination can really be ~~unfift~~ "unleashed".

Mr. Bezos' thoughts are echoed by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter). In 2021, he

said of the human race: "We ~~want~~ don't want to be one of those single-planet species; we want to be a multi-planet species". Earlier this year, Mr. Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilization than global warming... mark these words". Mr. Bezos conceives of people living in giant space stations. He said most inhabitants of this world would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources on the moon or on asteroids instead of using up Earth's.

Task 8.

1. Alaska is an American state that first belonged to the Russian Empire. Russians saw more benefit in selling the territory than exploiting the resources on it, therefore, it was sold to America.

2 In the end of the 18th century, Georgia had a "British side", where colonies were aligned. It is common knowledge that America once belonged to Great Britain, but this "British side" makes Georgia stand out.
