Mister Bezos are asked by „fellow” multi-billioner 'Elon Musk', owner of SpaceX (formerly known as Twitter). In 2021 he said of the human race: „we don't want to be one of these 'single-planet' species, we want to be a „multi-planet species”. Earlier

Task 4

In a vibrant coast town, Zoe, young chef with an extraordinary talent, thrived. Fascinated by exotic flavors, she dedicated her life to creating innovative dishes, her skills far surpassing those of her traditionalist colleagues.

One brisk morning, Zoe embarked on a quest for culinary inspiration. Driven by her passion for unique ingredients

She explored local markets and remote fish villages. She wandered through bustling bazaars, her senses alight with an array of spices and fresh seafood. Her search brought her to ~~hiding~~^{hidden} cove at dawn, just as the fishermen were bringing in their early catch.

There, Zoe discovered a rare fish, its flavor unlike anything she has ever tasted. This discovery ignited a burst of creativity. Ocean's bounty was exhilarating, but there were unexpected finds that truly inspired her. Zoe's culinary adventures, blending traditional techniques with avant-garde tastes, soon became legendary, inspiring others to explore and embrace diverse aspects of flavors of the world.

Task 3:

Just when demographers are „ringing alarm bells about our population“, Amazon founder Jeff Bezos says with need to populate our Solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand year time. He replied: „I would love to see, just you know, a trillion humans living in the Solar system. If we had a trillion humans, we would have at any given time 1,000 Motorbats and 1,000 Einsteins. Space would be full of life and intelligence and energy.“ He added that he wants to help „build heavy infrastructure that will be judged by the space entrepreneurs of future generations... so that in the new era of imagination can truly be on life.“

Mr Bezos's thoughts are echoed by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter). In 2021 he said of the human race: „we don't want to be one of those single-planet species, we want to be a multi-planet species.“ Earlier this year Mr Musk warned that: „population collapse due to birth rate is a much bigger

risk to civilisation than global warming... mark these words" Mister Beres conceives of people living in giant space stations. He said most inhabitants of this world would visit Earth for vacations. He envisions ~~8~~ our planet returning to its pristine environment, as factories would be built in space. He said they would exploit ~~resources~~ on the moon or on asteroids instead of ~~living up~~ Earth.

Task 9:

So, I have a friend named Jake. He is a rather charming fellow, certainly has a way with words at least, and also surprisingly smart and witty. That is, when he's in a calm mood. When he gets excited though, and he gets excited pretty easily mind you, ^{and he so clumsy} he can make decisions so irrationally, that it's almost comical.

Once, he was really looking forward to a certain event. I ~~don't~~ ~~remember exactly what it was~~, and got into his head that 'he had to be at it'. The problem was that there was a limited list of guests, and he didn't have time to register for it. I didn't have time, but, coincidentally, I wasn't very interested in visiting. So, when he asked me to give him my guest card, I easily accepted it. Nothing could go wrong, I thought to myself. Then ~~everything~~ ^{it} went wrong.

Jake lost my card. I don't know exactly how it happened, every time he seems to tell me a different story. What matters is, after that, he made a deal with someone else where he bought a card from them. Then he lost this one too - dropped it into a manhole. He rarely gets sad, but after that he was blue for at least a week.
