Task 3

Just when demographers are ringing alarm bells about overpopulation, amazing founder Jeff Bezos says we need to populate solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins ... space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations ... so that ingenuity and imagination can really be unleashed."

Mister Bezos's thoughts are echoed by fellow multi-billioner Elon Musk, owner of X (formally known as Twitter). In 2021, he said of human race: "We don't want to be one of those

single planet species; we want to be a multi-planet species."

Earlier this year, Mister Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilisation than global warming... ~~make~~ mark these words."

Mister Bezos considers of people living in giant space stations.

He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources on the Moon or on asteroids instead of using up Earth's.

Task 9 "An Misadventure Turned Adventure"

One day, two brothers Mike and James were playing outside. They were putting a small boat on a narrow stream and were acting like real captains. Suddenly, Mike fell into the stream and the boat started to go away from the boys. "Oh no!" - screamed the frightened children. They started following the boat, trying to catch it, but every time the toy was faster. Besides, they were running down the street, which made them run faster and faster until... they started to fall! Mike began to roll on the road like a ball and that caused him loose the gravitation. At that time, James, as he was trying to slow down, started circling like a wooden soldier! A few minutes later the street as well as the stream seemed to finally finish. But, unfortunately, our silly boys ~~were not~~ weren't pretending to have a soft landing. Instead, they faced a huge fence and... They hit it! When Mike and James opened their eyes, they could see their boat peacefully floating away from the boys. After a silent pause, they started laughing and quickly forgot about their toy. Never had they had such an adventure!

Task 8

1. Alaska: Now this state is a part of the USA, but in previous times this territory used to be owned by the Russian Empire ~~Rus~~. Besides, the length between the border of Russia and Alaska is only three kilometers.

Bridge" is located in San Francisco, California. The state is located near the Pacific Ocean and due to that regular windstorms happen there, which sometimes causes the bridge to crash.
