Teens spend a lot of time on internet on a daily basis. It's such a big problem in the modern world. ~~At~~ Now, I want to analyze the presented diagram to find the reasons of their high social media activity.

At first, a big majority of teens are on social networks. Social networks are places where you can find a lot of propaganda that could be harmful for teens' mental condition. In my opinion, they use social media to forget about the reality. It's quite popular situation in our dynamic world.

Moreover, 34% of them chat to their friends everyday. I believe, that the reason of it that teens are very lazy and don't want to live their home.

Furthermore, 25% of Facebook users are under the age of 10. I think that you have to show your passport before logging in. Because there are people who want to talk to little girls and boys. Who knows what they can talk about? It's very dangerous. Because some people want to adults want to talk to children.

In conclusion, using social medias every day could be harmful for teens.
