8. If I have to finish revising our report I won't be able to attend the conference tomorrow.

9. Everybody in my family is computer literate.

10. I wish I could speak five languages.

Task 7

Once my friend said to me 'I hate living in a big city'
And I agree with that statement. Why?

First of all the ecological problems are really urgent there. For example the air in big cities is usually polluted, because of different factories and gases, that ~~cars~~ produced by cars.

Secondly, I hate traffic jams and long distances. They are always really annoying.

And finally, in my opinion, the quantity of robbers and burglars is higher in big cities.

Task 8

A pie chart is provided showing daily activities for teenagers. As we can see it, about seventy three percent of teens are on social networks and twentytwo percent log on to Facebook over ten times perday. In my opinion, it is connectet with convinence. Because it is far more difficult to socilize in real life than on the Internet. And also for that reason the average amant of Facebook friends is twohundred and one. It is even easier to talk using social network, that's why thirty seven percent of people send messages to friends everyday. The chart shows that 25% of Facebook users are under the age of ten. As for me, it isn't safe for children to use social network.

In conclusion I would like to say that nowadays it is easier for teens to communicate using social networks and it has a big role in our lifes.
