Task 3

Just when demographers are ringing alarm bells about overpopulation, Amazon Founder Jeff Bezos says we need to populate our solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time ~~a 1000~~ thousands of Mozarts and thousands of Einsteins... Space would be full of life and intelligence and energy." He added that he wants to help build heavy infrastructure that will be used by the space entrepreneurs of future generations, so that ingenuity and imagination can be really unleashed."

Mr Bezos' thoughts echoed by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter).

In 2021, he said of the human race: "we don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, Mr Musk warned that: "population collapse due to low birth rates is a much bigger risk ~~to~~ civilization than global warming... mark these words". Mr Bezos conceives of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources of on the Moon or on asteroids instead of using up Earth's.

One brisk morning, Zoe embarked on a spontaneous quest for culinary inspiration. Driven by her passion for unique ingredients, she explored local markets and remote fish villages. She wandered through bustling bazaars, her senses alit with arrays of spices and fresh seafood. Her search brought her to a hide cove at dawn, just as the fishermen were bringing in their early catch.

There, Zoe discovered rare fish, its flavor being unlike anything she had ever tasted. This discovery ignited a burst of creativity. The ocean's bounty was exhilarating, but there were unexpected

Task 8

- California:

~~califor~~ Today California is the most populated state in America, its largest metropolitan areas being Los Angeles, San Francisco and San Diego ~~and~~ ~~other~~ In the past, the state used to be part of the Kingdom of Spain.

- Hawaii

~~They are~~ The only island state, as well as the only state with a time zone of its own. It's renowned mostly for touristic popularity, but there's actually much more to it. One of its interesting features is the volcanic desert on one of the islands.

- Alaska

Alaska is the state with the largest area in the US. Back in the 19th century, it used to be part of the Russian Empire, but later it was bought by America for an amount of money now considered extremely small for such a gigantic piece of land.

- Florida

Florida is also unique in its own way: if you look at the map, this state would resemble a little peninsula. Florida is known for having crocodiles, more precisely, alligators, and other types of exotic animals. Being one of the southern states, it attracts the most tourists due to its almost constant hot weather.

- Illinois

Illinois is a central US-state, part of its border going through Lake Michigan. Its biggest city by far is Chicago with several million inhabitants. Chicago ~~also~~ serves as the main touristic attraction of the state as it's ~~the~~ one of America's gastronomical capitals.

Task 9.

That day, me and my friends were just having fun driving a boat in the middle of the Atlantic ocean. That's what average people do on weekends, right? Yeah, exactly. As you could have already figured out, we were in serious trouble. Looking around, we could see... absolutely nothing. The dark blue sky over the still waters of the Atlantic seemed like ~~the~~ abyss to us.

Three of us on a tiny motorboat, probably ~~was~~ destined to stay there forever. Those were our thoughts at that moment. As I was ~~talking~~ ~~staring~~ doing another stare into the maritime void, a little dot popped up somewhere in the middle of it. At that exact moment our life goal literal "life goal" became to make that dotting-almost invisible green dot bigger.

As hours passed, we felt and saw it getting closer and closer to us. Even at night, we kept rowing, as there ~~was~~ ^{seemed} no fuel left. Although initially it ~~had seemed~~ impossible, we actually managed to reach the dot which appeared to be ~~the~~ a vivid, lively, breathing inhabited ~~inhabited~~ island that is known as St Helena's, ~~island~~.
