Task 4

Many people who live ~~is~~ in cities would like to move to a silent place like countryside and I agree with that decision.

At first I would like to mention that most of cities are air-polluted and it makes us hard to breathe and can cause a lot of health disorders while in the ~~con~~ countryside the air is clear.

Amidst that bustling and overcrowded ~~streets~~ ~~makes~~ cities make us always be in haste but in countryside life is going slowly.

I see more positive aspects in living in a countryside than in a big city.

Task 8.

As I think, ~~teenagers use~~ mostly teenagers use social network because of the cultur impact. Many teenagers try to conform into society ~~now~~ norms, that is why they are trying to be fashionable and follow newest fashion ~~th~~ trends that are popular on social networks

In my opinion, 34% of people send messages everyday because of their social needs. Arguably, they might love ~~commy~~ communicating with other people and ~~maybe~~ that is why ^{they} try to keep in touch with their friends.

I might be wrong, but I think that teenagers log on Face book over 10 times per day because of their curiosity. They want to know ~~latest~~ the latest news and check amount of likes on their posts on social media.

~~As For me,~~ As for me, mid-childhood is an intense period of growing up and exploring the world, and maybe that's why children want to get new experience by trying social networks, and be a bit mature like adolescences do.

In my point of view, those people who have a lot of online friends are quite gullible. Our acquaintances are not our friends and that immense amount of online friends shows that teenagers can't understand who should they trust.
