Task 7

"I hate ~~&~~ living in a big city."

One of the main disadvantages of the big cities is how loud they are. Often people complain about not being able to fully rest due to noise disturbances that big cities provide. Also in most of the cases big cities don't have a lot of ~~parks around their~~ places where people could lose their nature and some ~~of them~~ might feel miserable because of that. Last but not least is ~~the fact~~ that everything is too far away from each other.

Task 8.

Analisation of "Teen Social Networking Stats" is a great way to ~~carefully~~ observe how much influence social networks have on teens.

The diagram shows that 43% of teens are on social networks and 34% of them send messages to friends every day. That's not a surprise since social networks are one of the main sources for socialising these days. It's an easy way to contact people or share your thoughts ~~and work on the your page~~. That way some teens find new friends or inspirations ~~and comfort~~.

Speaking of networks, let's talk about Facebook. Most concerning information is that 25% of users are under the age of 10. It demonstrates the influence Internet has on us, since parents aren't worried about letting their underage children have their own social accounts. Children learn to use networks at a young age, what on one side shows how progressive our society is nowadays but also concerning

because ~~on the end of the day~~, Internet is a very dangerous
place, ~~especially for children~~
