7. She could say that in a big city, it is always very loud and it is hard ~~to~~ just to sit in silence. Even at night, you are trying to sleep and there are cars passing by your house all the time. She could also say that big cities are often overpopulated which can cause problems such as homelessness or lack of car parking places. The huge amount of cars also leads to air and water ~~polluting~~ pollution.

8. Social networks play a huge role in our lives today. I would like to analyze the diagram and discuss the influence of social media.

According to the diagram, most of teenagers nowadays are on socials, 22% log on to Facebook over ten times daily and the average teen has around 201 friends there. It is also mentioned that 37% of teens send messages to ~~their~~ friends every day. This means that modern life is concentrated in our devices and many of us communicate on socials more often than in real life. Besides, 25% of Facebook users are under the age of 10, which means that instead of reading books or playing age-appropriate games with friends, modern kids start using social networks. The main reason may be parents who cannot or do not want to look after their children and give them smartphones instead.

In conclusion, I would like to add that although social networks are important for us, it is necessary ~~to~~ not to forget about real life and real people.
