Task 7

One day, a friend of my mine once said to me 'I hate living in a big city! She was really depressed. I supported her, but she just ran away. I can suppose, that she can't stand horrible food in the city. For example, scientists who make bad eggs and milk. In my opinion, she doesn't like the city because of the air pollution, dirty rivers. Even worse, people make fires and drop rubbish everywhere

Task 8

Social networks. They are the most popular things nowadays. Adults work there, take and post photos, chatting, but not only adults use social networks.

There are a lot of teenagers and children, who use them as well. Today I would like to analyze the presented diagram, present my hypotheses and discuss possible reasons for these changes we can see, that 73% of teens are on social networks, nearly 37% use messengers every day.

That is a big problem. These numbers are really huge. 25% of teenagers, who use Facebook are under the age of 10. That is thing is just shocking! My hypotheses are quite sad, I suppose in 10 years the situation will be worse than now and numbers will be more bigger. I have a solution! They helps teens be less addicted.

Schools can make more competitions, sing battles and other things. Even more, the government can block some social networks and messengers ~~and~~ bad apps.
