If we had a trillion humans, we would have at any given time 1000 Mozarts and 1000 Einsteins... Space would be full of life and intelligence and energy." He added that he wants to help build heavy infrastructure that will be used by the space entrepreneurs of future generations so that ingenuated imagination can really be uplift.

✓ Mister Bezos thoughts are echoed by fellow wealthy-billionaire Elon ~~Musk~~ Musk, owner of an X (formerly known as Twitter). In 2021, he said of the human race: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, mister Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilization than global

warming... mark these words." Mister Bezos can conceive of people living in giant space stations. He said most inhabitants of these would visit Earth for ~~weekends~~ vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources on the Moon or ~~on~~ asteroids instead of using up Earth's.

There was no pain at first, only the desire to calm down my frantic cousin (the one that threw me in the general direction of this table ~~in the first place~~). "Albert, relax," I said, feeling my head for any injuries, "I'm totally fine," it was while saying this when I felt an ~~the~~ actual hole in my head. "Okay, I'm not fine, call grandma," I mumbled, ~~feeling~~ now realizing that blood was all over my head.

All is well that ends well, huh?
