Task 4.

For example, she disliked living there because there are not as many malls, shopping centres and entertainment structures as in the city, maybe she wanted more.

By the way, probably her way to school, job etc. takes a lot of time and is too long.

Perhaps, she hated living there because she is a sociable person and she is about to make new friends constantly. Without such opportunity she felt so lonely and even got a depression.

Task 8,

This graph shows adolescents' daily activities. Firstly, I'd like to say that teens can't spread their time rightly.

The main part of the chart says that teenagers spend their time mostly sleeping. I suppose that nowadays guys are spending so much time in sleep because of their boredom or tiredness even a bit.

The other thirty percent're spreaded between studying and eating. From the one hand it is so in the case that eating is one of the most essential parts of our life.

And from the other hand nobody can live in today's world without knowledge. That's why adolescents spend 15 percent of their time studying.

The other fact is that percentage of sports, time online, videogames and texting are equal. In my attitude it happens because everyone has his own hobby. Someone prefers jogging, the other one likes playing videogames.

That's all I wanted to say about this chart.

Task 9.

1 mark

2 can't

3 Bolder

4 holiday

5. Training
