Task 7.

Nowadays there are lots of big cities. Unfortunately not everyone like it, and reasons are different. I my

opinion the biggest disadvantage is crowds of people everywhere: in subway, in cafes, in shopping centers. Other reason can be pollution. Big city causes lots of traffic and greenhouse gases. Sometimes it can be really difficult to ~~brea~~ breathe near the road. Moreover it's really noisy outside: cars are driving; new houses are building; dogs are barking.

Task 8.

Now internet is one of the most important part of our life. 43% of teens using ~~net~~ social network show us that my first statement is true. All our routine has already been in our phones: shops, school marks and other things. Also we chat with our friends online. About 34% of teens send masages every day. Everyone need a friend but maybe you haven't ^{not} got him at school or you too busy. Social media is a greak thing to solve this problems: you can tap or record

a massage while going somewhere. You can also talk to your friend who is far away right now in a ~~moment~~ moment. So that average teen has 201 Facebook friends. 25 % of Facebook users are under the age of 20. I think it is not good because parents can't control them there.

All in all social network is great but we need to control how much time we spend on it.
