Task 7.

There are various reasons why someone could hate living in a big city. Firstly, it is so noisy! There are always cars driving around so it'll be hard to get some sleep. Secondly, everything is extremely expensive! Thirdly, the food isn't organic. Everything has chemicals, which ~~negatively~~ harmfully affects your body. Also, the city is polluted, so it'll be hard to get some fresh air. There are just some of the negatives of living in a big city.

Task 8.

The presented diagram shows the daily activities for teenagers. Analyzing the pie chart, I can say that our generation spends a lot of time online.

73% of teens are on social networks. I think, that this has to do with the fact that social media has become a way to share information to a big amount of people at the same time! I was shocked when I found out that 25% of Facebook users are under the age of 10! This is a problem. Parents should control their children and limit what they watch online. Social media allows teens to message their friends instantly. That's why 37% of teens send messages to friends every day and 22% log on to Facebook over 10 times a day.

I can make a conclusion, that social networks play an important role in a teenagers life, but we should still know how to limit our time spent online.
