Just when demographers are ringing alarm bells about over population, Amazon founder Jeff Bezos says we need to populate our Solar System. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see you now, a trillion humans living in the Solar System. If we had a trillion humans, we would have at any given time 1000 ~~Mozarts~~ Mozarts and 1,000 Einsteins.... Space would be full of life and intelligence." He added that he wants to help "build heavy infrastructures that will be used by the space entrepreneurs of future generations... so that indigenous imagination can really be unleashed."

Mister Bessus' thoughts are echoed by fellow multi-billioner Elon Musk, owner of X (formerly known as Twitter). In 2021, he said of the human rights: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Early this year, Mister Musk warned that: "population collapse due to low birth rates is a much bigger risk to civilisation than global warming... mark his words." Mister Bessus can see sleeves of pupils living in giant space stations. He said most inhabitants of this would visit Earth for vacations. He envisage our planet turning to its pre-stress environment, as factories would be built in space. He said they would exploit resources on the Moon or on asteroids instead of using up Earth's.
