Task 3

Just when demographers are ringing bells about our population, amazing founder Jeff Bezos says we need to populate our solar system. Mister Bezos was asked for his thoughts on humanity living in the outer space in a thousand years time. He replied: "I would love to see you now, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins... space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be judged by the space entrepreneurs of future generations so that ingenuity and imagination can really be unleashed."

Task 3 (упражнение)

Mister Bezas thoughts are ^{shared} by fellow multi-billionaire Elon Musk, owner of X (family noun of Twitter). In 2020, he said of the human raise: "We don't want to be won of those single-planet species; we want to be a multi-planet species." Earlier this year, Mister Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilization than global warming... make these words." Mister Bezas can envisages of people living in giant space stations. He said most inhabitants of these would visit earth for vacations. He envisions our planet returning to pristine environment, as factories would be built in space. He said they would exploit resources on the moon or on asteroids instead of using up earth's.
