Task 7.

~~First of all, there are usually no shops and supermarkets near you. When you are living in a city, you just need to go out and there will be a lot of shops near you. But you can easily buy anything you need. But if you are living in a countryside you need to spend a lot of time to get what you need. The next reason is that there are only few interesting activities. In a city you can go to cinema, go to restaurant, spend time in a park and go wherever you like. But in a countryside there are not a lot of things to do.~~

The first reason that there are ^{usually} only few interesting activities in the countryside. But in a city ~~you~~ can go there are a lot of places where you can go and a lot of things which you can do.

~~Next sports, phone/texting and, online and video games.~~

Next, 15% of time teenagers spend on eating and studying / doing homework. ~~Next~~ Normally, people eat 3 times a day. ~~And time~~ Studying is a really important thing in teenager's life. So the results are not surprising. Finally, ~~the~~ 10% of time takes sports, phone/texting, online and video games. ~~This is the~~ ^{one of the} activities teenagers usually do to spend their free time. These are the

In my opinion the amount of time spent on online, phone/texting and videogames will increase, because teenagers are becoming more addicted to their mobile phones. Moreover, studying without using ^{the} internet is almost impossible nowadays. ~~Teenagers are~~ ~~spending more time at school, so~~ ~~they~~ ^{many teenagers} ~~they~~ Studying may be ^{difficult} ~~easy~~ for them. That is why teenagers prefer to spend ~~more study~~ ~~study~~ their time doing homework, rather than sleep normally. ~~Also~~ Also teenagers are becoming more ignorant to sports this is the reason why they may spend less time on it.

This is my opinion on this pie chart.
