Task 3.

Just when demographers are ringing alarm bells about overpopulation, amazing founder Jeff Bazes says we need to populate our solar system. Mr Bazes was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1,000 motes and 1,000 crinoides ... Space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations ... so that ingenuated

imagination can really be unleashed.

Mr Bazes's thoughts are echoed by fellow multi-billioner Elon Musk, owner of X (formally known as Twitter). In 2021, he said of the human race: "We don't want to be one of these single-planet species; we want to be a multi-planet species." Earlier this year, Mr Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilization than global warming..." Musk said these words. "Mr Bazes can envisage of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would

exploit resources on the Moon or on asteroids instead of using up Earth's.
