Task 3.

Just when demographers are ringing alarm bells about overpopulation, Amazon founder Jeff Bezos says

we need to populate our solar system. Mister Baezoz was asked for his thoughts on humanity living in outer space in a thousand year time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins... space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... so that ingenious imagination can really be unleashed."

Mister Baezoz thoughts are around by fellow multi-billioner Elon Musk, owner of Ex (family known as Twitter). In 2021, he said of the human race: "We don't want to be one of those single-planet species, we want to be a multi-planet species." Earlier this year,

Mr. Musk would say that: "Population collapse due to low birth rates is a much bigger risk to civilization than global warming... mark these words". Mr. Baez conceives of people living in giant space stations. He said most inhabitants of this world visit Earth for vacations. He envisions our planet returning to its preaster environment, as factories would be built in space. He said they would exploit resources on the moon or on asteroids instead of using up Earth's.
