## Task 3

Just when demographers are ringing alarm bells about ~~overpopulation~~ overpopulation, Amazon founder Jeff Bezos says we ~~are~~ need to populate our Solar system. Mr. Bezos was asked for his thoughts on humanity living in outer space in a thousand years' time. He replied: "I would love to see, you know, a trillion humans living in the Solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins... space would be full of life and intelligence, and ~~energy~~ energy." He added that he wants to help "build heavy

infrastructure that will be used by the space entrepreneurs of future generations ... so that ingenuity and imagination ~~can be on the lift~~ can really be on lift.

Mr Bezos' thoughts <sup>echoed</sup> ~~are echoed~~ by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter). In 2021, he said of the human race: "We don't want to be one of those \*single-planet\* species, we want to be a multi-planet ~~speci~~ species." Earlier this year, Mr Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilisation than global warming... mark these words." Mr Bezos conceives of people living in ~~giant~~ <sup>gig</sup> giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources on the Moon or asteroids instead of using up ~~Earth's Earths~~ Earths.

#### Task 4

~~On one~~ In a vibrant coast town, Zoe, a young chef with extraordinary talent, thrived. Fascinated ~~but~~ by exotic flavors, she dedicated her life to creating innovative dishes, her skills far surpassing those of her traditionalist colleagues.

One brisk morning, Zoe embarked on a spontaneous quest for culinary inspiration. ~~Driven~~ Driven by her passion for unique ingredients, she explored local markets and remote fish villages. She wandered through bustling bazaars, her senses alight with an array of spices and fresh seafood. Her search brought her to a ~~the~~ hidden cove at dawn, just as fishermen were bringing in their early catch.

There, Zoe discovered a rare fish, its flavor unlike anything she has ever tasted. This discovery ignited a burst of creativity: ocean's bounty <sup>was</sup> ~~is~~ exhilarating, but there were unexpected finds that truly inspired her. Zoe's culinary ~~ad~~ adventures, blending traditional techniques with avant-garde tastes, soon

became legendary, inspiring others to explore and embrace the diverse flavors of the world.

### Task 9

Once, while exploring the rocky mountains of Cyprus, me and my family decided to drive to a slightly more secluded hiking trail than usual. Normally, my mom would guide us on such trips, as she had an impressive sense of direction. However, because the terrain leading up to the trail was extremely confusing, we ~~instad~~ instead opted to use a GPS navigator.

That decision turned out to be a terrible mistake. Our trip kept getting compromised by GPS's crazy directions. It would suggest us to drive through dense vegetation or even drive off cliffs. Eventually, we started following other cars, hoping that they would lead us to the right place.

After following one of the cars for a while, we found ourselves near the shore of a magnificent mountain lake. The air was fresh and crisp there, and the surrounding forest felt like a cool umbrella covering us from summer heat. We spent the rest of the day there, setting up camp and chatting and singing songs.

with other tourists. Surprisingly, what started as a disaster ended up being one of the best days of our trip.
