Task 7.

A friend of mine once said to me 'I hate living in a big city'. There can be too many reasons of her opinion. Firstly, in a big city there is a lot of air pollution whereas in a countryside the air is fresh. The next reason is traffic jams. Usually, in big cities there are too many cars, highways are full. Also, there are not so many parks in cities comparing with countryside.

Task 8

Teen Social Networking Stats shows teenagers' activity on Social networks.

43% of teens are on social networks. This may be because almost every teenager wants to communicate to his friends while not being with them. The other reason is to make new friends online. People having same interests, age and same cities, can talk to each other and make friends. That is also a reason of the fact 'The average teen has 201 Facebook friends'.

22% of teenagers log on to Facebook over 10 times per day and only 8% of American teens use Twitter. That makes sense. Facebook is more famous and convenient social network than Twitter, that is why much more teens use this network.

Social Networks now become more and more popular in many teens' lives. With them teenagers communicate, have some fun on long distances, make new friends online and learn something new and important.
