Just when demographers are ringing alarm bells about overpopulation, Amazon founder ~~chief~~ Jeff Bezos says we need to populate our Solar System. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the Solar System. If we had a trillion humans, we would have ~~had~~ at any given time 1,000 Mozarts and 1,000 Einsteins.... Space would be full of life and intelligence and energy." He admitted that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... So that ingenuity and imagination can really be unleashed".

Mister Bezos thoughts are echoed by fellow multi-billioner Elon Musk, owner of X (formerly known as Twitter). In 2021, he said of the Human Rise: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, Mister Musk warned that: "population collups due to low birth rates is a much bigger risk to civilasation than global warming... Mark these words." Mister Bezos conseves of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He invisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources on the moon or an asteroid instead of using up Earth.

Task 8

Florida: this state is famous on the Internet for having an insanely hot weather which frequently leads to roads and postboxes melting on the streets, and for ridiculous crimes that Florida's citizens ~~comm-~~ commit.

Hawaii: a rather remote from the USA island, famous for being a tourist destination for the wealthy. However, tourism negatively affects the state's cost of living and environment. Despite the official language being English, Hawaiian language exists.

Alaska: the coldest state near the boarder with Russia. Not a lot of people live in here. No public transport can exist in such conditions, so locals often use sleighs with dogs moving it instead of horses.

California: the state with one of the highest costs of living, but also one of the wealthiest states. Los Angeles is the most well-known city in California, famous for expensive restaurants and entertainment facilities as well as casinos. Lots of films were shot in here.

Task 9

Columb Christopher Columbus and a group of his ~~sailor~~ sailors set off to find a new path to the country of India. They load the boats with supplies and start their expedition. They sail for a week, they sail for a month, they sail for some more. Finally, they reach the land. They see some people. Overjoyed, the sailors run up to them to ask more about the land and generally exchange some words. „Hello? This is India, right?“, - Columbus asked the locals, who were dressed in clothes he hasn't seen before.

„... No? I'm pretty sure it isn't „India““, - one of

them replied.

"What do you mean it's not India? It's ~~diff~~ clearly India, we know where we sailed to," - stated how ~~confid~~ confidently Christopher.

"But... That's not the place you name. We've been leaving here for all those years and nobody called this land 'India'."

"Nah... It's India, I know better, and you, therefore, are Indians."

Locals, who in fact were not Indians & were too stunned to speak, not sure how to react to such claims.
