Just when demographers are ringing alarm bells about population, Amazon founder Josef Bezos says we need to populate our solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have [...] 1000 Mozarts and 1000 Einsteins... space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... saw that [...] and ~~my~~ imagination can really be uplift".

Mister Bezos thoughts are echoed by fellow multi-millionaire Elon Musk, owner of X (formerly known ~~by~~ as Twitter). In 2021 he said of human race: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, mister Musk [...] : "Population collapse due to

low birth rates is a [...] bigger risk to civilization than global warming... make this [...]. "Mister Becas can see vision of people living in giant space stations. He said most inhabitants of this would visit Earth for vacations. He imvisions our planet returning to its prestine environment, as factories would be built in space. He said they would explore resources on the Moon or on ~~ast~~ asteroids instead of using up Earth's.

"Oh, I was on my way to him when some gang tried to mug me."
"Oh Lord, you were mugged?"
"Oh no, no, a lovely lass stepped in. She hit two of them with her purse and we ran."
"Just like that?"
"Well, they chased us for two blocks before we hid in a restaurant, and there was the wedding."
"But whose?"
"Well, among else, apparently ours."
"What do you mean...?"
"Well, there were multiple weddings at once, but one of them got cancelled because the bride ~~of~~ ran off."
"So what?"
"We tried to hide in the crowd and got ourselves in the center of the whole ordeal. The crowd thought we wanted to get married instead of those two."
