Task 3.

Just when demographers are ringing alarm bells about overpopulation, amazing founder Jeff Bezos says we need to populate our Solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the Solar system. If we had a trillion humans, we would have at any given ~~moment~~ time 1000 Mozarts and 1000 Einsteins... Space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be just by the space entrepreneurs of future generations... So that ingenuity and imagination can truly be unleashed".

Mister Bezos' thoughts are echoed by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter). In 2021, he said of the human race: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, Mister Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilisation than global warming... Mark these words." Mister Bezos conceives of people living in Joint space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be

built in space. He said they would exploit resources on the Moon or on asteroids instead of using up Earth's.

Task 4.

In a vibrant coast town, Zoe, a young chef with extraordinary talent, ^{thrived} ~~was thriving~~. Fascinated by exotic flavors, she had dedicated her life to creating innovative dishes, her skills far surpassing those of her tradition-

nalist colleagues.

One brisk morning, Zoe embarked on a spontaneous quest for culinary inspiration. Driven by her passion for unique ingredients, she was exploring local markets and remote fish villages. She was wandering through bustling bazaars, her senses alighting with aromas of spices and fresh seafood. Her search brought her to a hidden cove at dawn, just as fishermen had brought in their early catch.

There, Zoe ~~she~~ had discovered a rare fish, its flavor unlike anything she'd ever tasted. This discovery ignited a burst of creativity: ocean's bounty was exhilarating, but there were unexpected finds that truly inspired her. Zoe's culinary adventures, blending traditional techniques with avant-garde tastes, had soon become legendary, inspiring others to explore and embrace the diverse flavors of the world.

Task 9.

It was a relatively warm rainy day in a forest in Southwestern Germany. My parents and I went hiking that day, hoping to explore the beauty of ^{the} European nature.

Everything was going well until we heard a branch snap behind our backs. Barely had I turned around to find the cause of the

sudden sound, ~~Barely had I turned around~~ when my dad ~~soot~~ shouted, "A wolf!". Even though we were mortified, we rushed to find a safe space, leaving trails of dust in the air behind us. After a short sprint we stumbled upon a peculiar building. It was a small castle with stained glass windows and murals on the walls. It looked strangely familiar, so we had decided to spend some time ~~investigati~~ studying its exterior, and after a couple minutes we had finally found a table that read, "Baron Stein's mansion". We couldn't believe it; at that exact place our favorite movie was filmed! This discovery had spurred us to enter the building and take some pictures inside ~~it~~ of it. The pictures came out marvelous! We felt just like our favourite movie characters. That is how fleeing from a wolf resulted in an adventure that was so memorable that I still keep telling people about it.
