Task 1

A friend of mine once said: "I hate living in the countryside". What reasons could she give?

Well, living in the countryside might be a real stress for some people. First of all, in the countryside there's no electricity.

Maybe she doesn't like staying without our everyday necessities, like microwave ovens, dishwashers and others.

Secondly, in the countryside there might be no Internet connection, so you can't use your smartphone.

And finally, it's really dirty in the countryside, maybe she doesn't like getting dirty.

Task 6

Here I can see a pie chart showing daily activities for teenagers.

I can see that sleeping takes the biggest space on this diagram. Sleeping is very important for our body and teens get very tired during the day. That's why it takes more space on this diagram.

than any other activity.

Both eating and studying take 15% of the chart. I guess that teenagers have to study a lot, so it takes as much space as eating.

~~Sports takes 10% of the pie chart.~~

In my opinion sport takes 10% of the chart, because teens don't have much time for it. They spend more time sleeping, eating and doing their homework.

Phone/texting takes 10% of the diagram. It's not as essential as sleeping, so it takes less space than sleeping.

I guess teens don't have much free time, so they don't spend a lot of time online — only 10%.

It's the same with videogames — teens don't have much free time. They spend only 10% playing video games.

Task 9.

1 -

2 - canteen

3 - back pack

4 -

5 - exercise
