Task 4

I have living in the countryside, feels like I've just travelled 100 years back in time. My house there is as big as my dog's shelter back in the city. Besides, it has nothing interesting except some ancient wooden furniture ~~and a broken bed~~. Want to drink water? You'll have to leave the house to the public hall and get some. You want to eat? You'll have to light up the furnace. You want to shower? You can't.

Task 8

Teenagers daily activities are quite different from other periods of ^{life} ~~time~~. According to the pie chart, the 70% of the time a teenager is awake, 15% is taken by studying and doing homework, which is fairly much. 30% of the time teenagers spend on electronics, 10% being online, 10% on their phones, texting or chatting, 10% playing videogames. In comparison with adulthood, it's a very long time online. During teenage, it's important to eat well, sleep well and do sports, that results in good health during adulthood. An average teenager spends 75% of daily time eating and 30% - sleeping. Some also do sports, that takes 10% of daily time. In my opinion, teenagers get less sleep than they need, although dif-

ferent people require different amount of sleep
a day, 7 hours might be too little. This lack is most
probably caused by the time on electronics
and studying.

Task 9

1. - grade
2. - cafeteria
3. - school bag
4. - ~~the lunch~~ recess
5. - training
