Task 7

My friend could've said 'I hate living in the countryside' for multiple reasons. For example, the isolation from society. It's still common in the countryside to have bad internet, which will make communicating with your friends and family challenging. On the other hand, it might be the countless insects which are a reason for a popular fear. The countryside is a brilliant place to get away from city life, however, it's not for everyone.

Task 8

This pie chart shows the percentage of the time teenagers spend doing things daily. Teenagers spend 30% of a day on sleeping and being online, 15% on eating and sleeping 10% on sports. 1

The majority of the time spent is online, which is approximately 8 hours. Teenagers lack activities other than surfing the Net. They may lose interest in the real world. Instead of this, they should take up a hobby or something related to that. Teenagers should be persuaded to go out more. I assume, that if we look at the daily activities of teenagers a couple years ago, it would be much more different. This may be the result of teenagers using electronics freely since they were a child, which may lead to being addicted in the future. We can already see the negative impact of gadgets on the lives of teenagers. They become socially awkward, they have a low-attention span.

Society has to do something to prevent this from worsening.
