Task 7

A friend of mine hates the idea of living in a big city. There are a few reasons why she hates it.

First of all, it is very expensive. She is a teacher and does not make a lot of money. Secondly, there are environmental problems. My friend has kids, and she does not want them to live in a polluted environment.

Of course, there are more reasons, but these are the most important ones.

Task 8

The diagram gives information on daily activities of teenagers.

According to the chart, 73% of teenagers use social media. In my opinion, the large number of teens using social media shows that they are familiar with modern technology and know how to use it. 37% of teens send messages to friends daily. Honestly, I like that we can communicate with friends and make new ones using social networks.

The diagram also presents that 8% of American teens use Twitter, 22% log on to Facebook more than 10 times a day, 25% of Facebook users are under the age of 10, the average teen has 201 friends on Facebook. Based on this

Information, we can conclude that Facebook is more popular than Twitter among teenagers, and a lot of teens use Facebook every day.

In conclusion, I think social media can be a useful tool. For example, you get an opportunity to get to know people from different places.
