Task 3.

Just when demographers are ringing alarm bells about overpopulation, Amazon founder Jeff Bezos says we need to populate our solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have a Tony given to 1,000 Mozarts and 1,000 Einsteines... space would be full of life and intelligence, and energy". He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... so that ingenuity and imagination can really be unleashed".

Mister Bezos' thoughts are echoed by fellow multi-^{billioner} ~~trillionaire~~ Elon Musk, owner of X (formerly known as Twitter). In 2021, he said of the human race: "We don't want to be one of those single-planet species, we want to be a multi-planet species." Earlier this year, Mr. Musk ~~once said~~ ^{warned that} "population collapse due to low birth

rates is a much bigger risk to civilization than global warming ... mark these words." Mr. Bezos conceives of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its presteen environment, as factories would be built in space. He said they would exploit resources on the moon or on asteroids instead of using up Earth's.

Task 4.

In a vibrant coastal town, Zoe, a young chef with an extraordinary talent, thrives. Fascinated by exotic flavours, she dedicated her life to creating innovative dishes, her skills far surpassing those of her traditional colleagues.

One brisk morning, Zoe embarked on a spontaneous quest for culinary inspiration. Driven by her passion for unique ingredients, she was exploring local markets and remote fishermen villages. She was wandering through bustling bazaars, her senses alight with an array of spices and fresh seafood. Her searches brought her to a hidden cave at dawn, just as the fishermen were bringing in their early catch.

There, Zoe discovered a rare fish, its flavour unlike anything she had ever tasted. This discovery ignited a burst of creativity: ocean's bounty is exhilarating, but there are unexpected finds that truly inspire her. Zoe's culinary adventures, blending traditional techniques with avant-garde tastes, soon became legendary, inspiring others to explore and embrace diverse flavors of the world.

Task 9

Once, two men decided to go fishing after a tough week. Recently, there had been a flood in the area, but the roads were dry and the weather was calm. So, the men took their fishing rods and other equipment and embarked on their journey.

Passing dense forests and small lakes, they had finally arrived and started chatting, drinking beer and making the attempts to catch some fish, without even a little awareness of how to do it right. By the time it got dark, they hadn't caught anything and felt extremely disappointed.

They were driving home in complete silence, when ~~the~~ heavy rain with hail started. Suddenly, the car stopped, a noise of wet mud under the wheels breaking the silence. Numerous attempts to get the car out of the mud being fruitless, the men decided to go home, leaving the car until the better times. Imagine their mood: wet, ^{walk} cold, exhausted, feeling like failures.

Walking through the forest, they noticed a splashing sound and got intrigued. Turning their torches towards the sound, they got struck. A large 4 feet catfish was splashing in a tiny pond created by the flood. The men started giggling and jumping and screaming in shock. "I guess, we are the best fishermen in this city!"
