Task 3.

Just when demographers are ringing alarm bells about overpopulation, Amazon founder Jeff Bezos says we need to populate our Solar System. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: „I would love to see, you know, a trillion humans living in the Solar System. If we had a trillion humans, we would have at any given time 1000 Mozarts and 1000 Einsteins... space would be full of life and intelligence and energy.” He added that he wants to help „build heavy infrastructure that will be used by the space entrepreneurs of future generations... so that ingenuity and imagination can really be unleashed.

Mister Bezos' thoughts are backed by fellow

multi-billioner Elon Musk, owner of X (formerly known as Twitter). In 2021 he said of the human race: „We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, mister Musk warned that: „Population collapse due to low birth rates is a much bigger risk to civilization than global warming... mark these words." Mister Bezos conserves of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. He said they would exploit resources on the Moon or on asteroids instead of using up Earth's.

Task 4.

In a vibrant coast town, Zoe, a young chef with extraordinary talent, thrived. Fascinated by exotic flavors, she dedicated her life to creating innovative dishes, her skills far surpassing those of her traditionalist colleagues.

One brisk morning, Zoe embarked on a spontaneous quest for culinary inspiration. Driven by her passion for unique ingredients, she explored local markets and remote fish villages. She wandered through bustling bazaars, her senses alight with an array of spices and fresh seafood. Her search brought her to hide in a cove at dawn, just as fishermen brought in their early catch.

There, Zoe discovered rare fish, its flavor unlike anything she had ever tasted. This discovery ignited a

Burst of creativity: ocean's bounty was exhilarating, but there were unexpected findings that truly inspired her. Zoe's culinary adventures, blending traditional techniques with avant-garde tastes, soon became legendary, inspiring others to explore and embrace diverse flavors of the world.
