Task 7

Living in a big city can be a problem for many people. The reasons can be different. Some people can't stand the noise. Actually, it's true. There're lots of cars in the big cities. These cars pollute the atmosphere with chemical gases. ~~what is the result~~ So, pollution is another reason why people prefer living out of the city. Also, in the big cities everybody always in a hurry and not every person will be a fan of such lifestyle.

Task 8

Nowadays more and more teenagers all over the world have an access to the Internet. It's not bad, however, some people have become addicted to the social networking.

Analyzing the presented diagram I can say that more than a half of all teens are on social networking. The most widespread app is Facebook where teenagers spend quite a lot of time (even little children because 25% of Facebook users are under the age of 10). There's one more app. It's Twitter. This social networking isn't so popular cause only 8% of American teens use it.

From my point of view, such number of teens spend so much time surfing the Net because it's a modern way to make friends, meet new people, take up a hobby, even get a job and much more. I suppose that there're such people who are lack of friends and they think it's the only solution for the situation. However, in my opinion, you should just be opened to this world and people will love you.

Actually, I think that we can change these stats in

case teens will be not so shy to make friends outdoors.

All in all, using social networking is a part of our lives, however, we need to limit the time we spend there. We shouldn't forget about real life.
