Task 7

My friend hated living in a big city. She hated noisiness and many people who talk a lot and run fast in different directions. There are a lot of buildings in big cities and you can get lost easily. Also people usually have to deal with a lot of work and complete tasks in a short period of time. So they become tired faster than in small towns, for example.

Task 8.

In this essay I am going to discuss possible changes present day hypotheses and and discuss possible changes which the chart presents.

We can see that daily activities for teenagers involve using phones. To be precise, most of them are on social networks, one of which is Facebook. It becomes more popular day by day. It leaves Twitter behind with 8% users behind. What is sad about Facebook? Children also have phones and 25% of Facebook users are under the age of 10. Although Facebook's content is not usually for

children. It can be dangerous. Sadly, Evil people are everywhere. But children sometimes ~~don't~~ do not understand this and it is easy to lie to them. As I have already said, Facebook has a lot of users, ~~20% of teenagers~~ log on to it over 10 times per day. 37% of them send messages ~~to friends~~ ^{to friends} every day.

Actually this statistics has an explanation. Now ~~this generation~~ ^{we} have a lot of possibilities because a lot of number of inventions ~~were made~~ have been made. We can use our phones every day and it is normal for us. So teenagers, who are really different from other age groups, spend a lot of hours in Internet and social networks.
