Task 3.

Just when demographers are ringing bells about overpopulation, Amazon founder, Jeff Bezos says we need to populate our solar system. Mr. Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1000 Mozarts and 1000 Einsteins. Space would be full of life and intelligence and energy." He added that he wants to help "build" heavy infrastructure that will be used by the space entrepreneurs of future

generations... So that ingenuity and imagination can really be unleashed".

Mr. Bezos's thoughts are recalled by fellow multi-billionaire Elon Musk, owner of X (formally known as Twitter). In 2021, he said of the human race: "we don't want to be one of those single-planet species, we want to be a multi-planet species." Earlier this year, Mr. Musk warned that: "population collapse due to low birth rates is a much bigger risk to civilization than global warming... Mark these words." Mr. Bezos conceives of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its preteen environment, as factories would be built in space. He said they would exploit resources on the moon or asteroids instead of using up Earth.

Task 4.

In a vibrant coast town, Zoe, a young chef with an extraordinary talent, thrived. Fascinated by the exotic flavors, she dedicated her life to creating innovative dishes, as her skills far surpassed those of her traditionalist colleagues.

One brisk morning, Zoe embarked on a spontaneous journey for a culinary inspiration. Driven by her passion for unique ingredients, she was exploring local markets and remote fishermen villages. She was wandering through bustling bazaars, her senses alighted with an array of spices and fresh seafood. Her search brought her to the hidden cove at the dawn, just as fishermen were bringing in their early catch.

There, Zoe discovered a rare fish, whose flavor was unlike anything she had ever tasted. This discovery ignited the burst of creativity: ocean's bounty was exhilarating, but there ~~would be~~ ^{were} unexpected finds that truly inspired her. Zoe's culinary adventures, blending traditional techniques with avant-garde tastes, soon had become legendary, inspiring others to

explore and embrace the diverse flavors of world.

Task 9.

It was sunny day in Edinburgh. John was walking from school with a huge smile on his face. You can tell it was a great day for John, and it was indeed. But it lasted not so long as John himself wanted.

'No, I won't visit Uncle Ben with you,' cried John, 'Never!'
'Yes you will my silly boy,' his father responded calmly. Uncle Ben was living in the countryside, so no surprise our little John refused going to harsh conditions of England's north. 'There's so much mud and pigs and... I just won't!' John continued. Hardly could he change something, as his trip ^{had} ~~was~~ probably ^{been} arranged in the skies before John ~~was~~ ~~had~~ ~~been~~ was born.

John and his father were heading to Mudshire, Scotland. Rains, wild animals, hills... John wasn't interested in all of that at all. He was the child of streets, born to bully others and play football. However, his feelings would sooner change radically.

'No, not again!' father shouted angrily. The engine was off. The situation was so horrific that John decided to take a walk.

Suddenly, he caught a glimpse of something ~~shiny~~ shiny on the floor. 'I can't believe my eyes! It's a coin!' said John with the visible excitement. Then he was able to find another one, two, three of them... 'I'm rich!' cries John happily.

'No, you aren't,' answered his father with a certain grin on his face. 'They are made of chocolate,' smiled his father.
