## Task 7

So, a lot of people want to live in a big city, but not my friend. I think it is because she probably like silents and a comfortable atmosphere without people. Well, the second reason that she can stay alone or single, maybe she can't make a good reationship with something. The third reason is money. There are a lot of expensive places, flats, restaurants in big cities and you need so much money to live here.

## Task 8

Now I'm going to analyze the presented diagram, present my hypotheses and discuss possible reasons. For start I want to say that so much teenagers enjoy being on social networks. You can see that 73% of teens do it because you can do a lot of thing on social networks. That's not unusual because ~~you~~ we live among technologres. And you see that 95% of Facebook users are under the age of 40. We show our life and see someone's life too. Moreover, teens send messages to friends every day (about 37%) because every person need to communicate with someone. Teens prefer hanging out with their friends because they can listen you, help. In the end I would like to say that less teens log on and have Twitter and Facebook because there a lot of social networks and they are better. That's all what I wanted to say.
