Just when demographers are ringing alarm bells about overpopulation, Amazon founder Jeff Bezos says we need to populate our Solar system. Mr Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the Solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins... Space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... So that ingenuitend

imagination can really be unleashed".

Mr Bezos's thoughts are echoed by fellow multi-billioner ~~Elon Musk~~ Elon Musk, owner of X (formerly known as Twitter). In 2021 he said of the human race: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year Mr Musk warned that: "Population collapse due to low birth rates is a much bigger risk to civilization than global warming... Mark my words," Mr Bezos conceives of people living in ~~the~~ giant space stations. He said most inhabitants of these would visit Earth for vacations. He ~~the~~ envisions our planet returning to its prestate environment, as factories would be built in space. He said they would exploit resources on the moon or on asteroids instead of using up Earth's.

Task 4.

In a vibrant coastal town, Zoe, a young chef with an extraordinary talent, thrives. Fascinated by exotic flavours, she has dedicated her life to creating innovative dishes, her skills by far surpass those of her traditionalist colleagues.

One brisk morning, Zoe embarked on ^{some} spontaneous quest for culinary inspiration. Driven by her passion for unique ingredients, she was exploring local markets and remote fishermen villages. She wandered through bustling bazaars as her senses were alighted with the array of spices and fresh seafood. Her search had brought her to a hidden cave at dawn, just as fishermen brought in their early catch.

There, Zoe discovered a rare fish, its flavour was unlike anything she had ever tasted before. That ~~the~~ discovery ignited a burst of creativity: ocean's bounty was exhilarating but there were the unexpected finds that truly inspired her. Zoe's culinary adventures, a blend of traditional

techniques with some avant-garde tastes, soon became legendary, inspiring others to explore and embrace the diverse flavours of the world.

Task 9.

Two delegations: one from USSR and one from America land on the Antarctica for a basic diplomatic meeting. Even despite the unfriendly relationship between the two countries people decide to drink for the meeting. After getting very drunk a Soviet officer says:

— Even though you, Americans, live in a well-developed country,

I bet you can't beat us, Russian, in making fast planes.

The American officer disagreed but to make sure they know who is faster they decided to ~~organise~~ hold a competition between the delegations. The country whose planes ~~are~~ were faster would get a half of the opponent's territory as a prize.

On the next morning when the Russian officer ~~was~~ woke up and understood the mistake he had made, he tied his plane to the American's one with a rope.

Both planes take off and the American officer asks:

- Where are the Russian?
- 100 meters close.

Replies a soldier. The American officer commands to change the wing geometry.

- Where are the Russians?
- 100 meters close.

The officer commands to turn on the extra engines to reach the same speed.

- Where are the Russians?
- 100 meters close.

The American officer starts to get nervous, meanwhile the weak Russian plane is barely coping with the speed. Finally, its wings simply fall off. The American officer sees it and says:

- We've done ... they'll win ...
- But why?

Asks the soldier.

- The Russian have just changed the wing geometry.
