If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins... Space would be full of ~~future~~ life and intelligence and ~~eneg~~ energy." He added that he wants to help "build heavy infrastructure that will be just by the space ~~entopronse's~~ entopronses of future generations..."

In 2021 he said of the human race "we don't want to be one of the single-planet species, we want to be a multi-planet species." Earlier this year, mister Musk warned that "population collapse due to low birth rates is a much bigger risk to civilisation than global warming... mark these words." Mister Bezos conceives of people living in distant space stations. He said most inhabitants of these would visit Earth for vacations. Task 9.

"A MisAdventure turned Adventure"

It was at during last spring, me and my friends were determined to go out and explore the woods near our area of living. It was something all of us wanted to do for a very long time, so we were very happy to finally try it. We gathered things we thought were useful for our "adventure": bottles of water, our phones, pop rope. This set of things made us feel like a real life explorers.

"Let's begin" my friend said, we went in. It was pretty dark in the forest, no ray of sun could really come through the thick layer of tree's twigs and branches. We ran through the wood, happy from earlier ~~unknown~~ feeling. We jumped over little puddles, kicked stones and laughed. But our mood changed quickly. We ~~found~~ found torn apart deer's leg. It was rotting and the smell was disgusting. Some of us screamed, they were afraid. Then we realised that we don't remember where to go, we were completely lost. ~~Our friend group wandered in the woods until dark, in bad mood and scared.~~ In a few ~~hours~~ hours we were rescued by police officers, who happened to go near.

I recommended everyone to stay safe. Don't seek
for adventures in dangerous places.
