Task 8

In this essay I will present my opinion of Daily Activities for teenagers based on pie-chart.

Almost half of their time is for basic needs, such as sleeping and eating. Teens go to bed late, so they sleep at day-time sometimes. Also, teenagers usually watch something while having their meal. These ^{facts} explain why they spend 45% of their time for sleeping and eating.

Spending time for sports, texting, playing videogames and being online is equal ~~to~~ 30% of their day is all about being online, with telephone in hands. No wonder, as the impact of the Internet on people is massive. Teenagers communicate, spend time in games and just relax in online world. It is quite dangerous that only 10% of daily activities is contributed to sports. Sport is essential as it develops your body, brain, muscles.

Still, 15% of teens' time is paid to homework, because it is a very important part of any schooling process.
