TASK 4.

Living in a big city can be very problematic. Every day you need to go to school or to work through the crowds or a busy traffic on the roads. And also many sounds like people talk, someone listens to music without head phones, engine sounds, every one honks without a reason. That is embarrassing and can even hurt your nerves and then your mood. All I want is just peace and quiet.

TASK 8

We have a diagram in which has statistics of teens' social networking and I want to present my hypotheses and possible reasons for these changes.

At first, ~~the thing that~~ most ~~fact that~~ most teenagers are on social networks is not surprising. Nowadays we have connection to the Internet from different parts of the world, and that's why social media in these conditions is the best way of communication online.

The popularity of social networks is increasing ~~the~~ every day. ~~They~~^{It} provides lots of information and it's easier to make new friends with it. You can chat with strangers, post your photos, ~~too~~ too, ~~likes~~, reactions, comments — ~~all~~

Likes, reactions, reposts, comments — all these things make you feel quite popular, like no one. When you have many friends on Facebook, everyone thinks that you are an interesting person. As I think, that is the reason that the average teen has so many friends.
