Task 3

Just when demographers are ringing alarm bells about our population, Amazon founder Jeff Bezos says we need to populate solar system. Mr. Bezos was asked for his thoughts of on humanity living in outer space in a thousand years time. He replied: I would love

to see you now, a trillion humans living in the solar system. If we had a trillion humans we would have at any given time 1000 Mozarts and 1000 Einsteins... space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... so that interplanetary imagination can really be unfettered."

Elon Musk's thoughts are by fellow multi-billionaire Elon Musk, owner of Ex (formally known as Twitter). In 2021 he said of the human race: "We don't want to be one of these single-planet species, we want to be a multi-planet species. Earlier gesture, mister Musk warned that population collapse due to low birth rates is a much bigger risk to civilization than global warming... mark these words!" Elon Musk can't see people living in giant space stations. He said most of inhabitants of these would visit Earth for vacations. He envisions our planet ~~not~~ returning to its pristine environment, as factories would be built in space. He said they would ~~exploit~~ explored resources on the Moon or on asteroids instead of using up Earth.

Task 8

Alaska is situated in the north-west of the United States. Firstly this territory was explored and colonized by Russians. It was rather difficult to keep control over such a remote region so Russian emperor Alexander II sold it to the USA.

Hawaii islands are located in the Pacific Ocean. This territory joined the USA in the 20th century when Military Japan was defeated. The climate of this place is so beautiful so it seems that living there is complete utter bliss.

Minnesota is situated in the Northern part of the US near the Canadian border. Climate in this place is cold enough to do skiing or ice skating in the winter season.

Kansas is located in the middle of the US. Its terrain is rather plain and dry, and it's worth saying that hurricanes occur there rather frequently. Also actions of the Oz book took place here.

California is a state which is situated in the western part of the US. Its northern part was colonized by Russians and southern by Spanish. This place has many buildings of the past time. For instance, you can visit Fort Ross which was found by Russians a few centuries

ago.

Task 9

A Misadventure turned Adventure

David was just an ordinary office worker. His job was really routine and he couldn't stand it. Everyday was nothing but a nightmare and it could continue up to many years until but one accident changed everything.

One day he woke up too late. The electricity was cut off so he couldn't iron his clothes. He ran towards the bus station. And it was such a coincidence that the bus has just left the station.

Then a heavy rain started. "What a misadventure!" He thought. Then he decided to set off by foot, and on his way he ran into an old lady.

She asked him for some help. He decided not to refuse old lady's will, because he was late for 4 hours, so he must be fired already. David brought lady's packaging to her house. But... the house seemed familiar to him.

It turned to be a place where he had spent his childhood. He told about it to the woman. She smiled and suggested him to enter the house.

Then she asked whether he could climb the attic and the answer was positive.

He went up stairs and found some boxes which comprised his old things. An old lady said she didn't want to throw these boxes away when she bought the house, because she thought them to be so lovely and something like a part of the house's history. "What an adventure", David thought. What did he care about losing his job when he found something different, his old memories.
