- 10. I wish I could speak five languages!

Task 8.

- 1. Museum
- 2. Table
- 3. School
- 4. Exam
- 5. Homework

Task 7.

In my opinion, I hate living in a big city for many reasons, including environmental and economical problems. Also, not every person likes the atmosphere of a big city.

Firstly, there are ^{often} too much people in a big city. Sometimes streets and public transport are overcrowded, that can be uncomfortable and even dangerous.

Secondly, there is a bad environmental ^{situation} in big cities because of cars. They produce a big amount of carbon dioxide and methane and make air polluted.

Thirdly, ~~there are too many expensive apartments in big cities, so not everybody can pay for a flat. Some people become poor and work~~

Task 8.

Now I want to analyze the teenagers' social networking spots.

In my opinion, nowadays 73% of teens are on social networks because it helps to communicate easier. Everybody can ~~send messages~~ chat with ~~his~~ friends and relatives from different parts of the world. You can always read news and watch videos on social networking sites, they give a lot of opportunities to meet new people. That's why the average teen has 201 Facebook friends and 37% send messages to friends every day.

Personally, I think that 22% of teenagers log on to Facebook over 10 times per day because it helps to cope with emotional pressure and escape from reality. As for me, I usually log on to social networks when I want to get rest between lessons or after a tough day in school.

In my opinion, 25% of Facebook users are under the age of 10 because some parents make accounts for their children to teach them how to use social networking sites.

Moreover, nowadays Twitter is not so popular as Facebook, that's why only 8% of American teens use Twitter.

In conclusion, social networking sites became a part of our everyday life and a lot of teenagers enjoy using them today.
