Just when demographers are ringing alarm bells about overpopulation, Amazon founder Jeff Bezos says we need to populate our solar system. Mr. Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1000 Mozarts and 1000 Einsteins... Space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generations... so that ingenuity and imagination can really be enlisted".

to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, Mr. Musk wound that: "Population collapse due to low birth rates is a much bigger risk to civilisation than global warming. Mark these words." Mr. Bezos conceives of people living in giant space stations. He said most inhabitants of these would visit Earth for vacation.
