- 8) If I have to finish revising our report I won't be able to attend the conference tomorrow.
- 9) Everybody in my family is computer literate.
- 10) I wish I could speak five languages.

Task 7.

In my humble opinion, there are a lot of reasons the girl could give. Living in a big city can be convenient not for everyone.

The first drawback of living in a big city is that it takes a lot of time to reach your destination because of the car traffic. Another disadvantage is polluted air. It comes from factories. That proves that living in a big city affects our health.

Task 8.

Analyzing the presented diagram, we can see that 73% of teenagers are on social networks nowadays. That's a big percentage! Moreover, there are some hidden dangers of social networks. For instance, if you post your new photos on your page and some hater comments it in an aggressive way, you may get upset and don't want to post anything on your page ever again. Not to face it, there is a precaution: you should make your page on social network private. If you do this you will be able to allow viewing your page ~~only~~

people you trust. Also, we can notice in the diagram ~~we see~~ that the average teenager has 201 Facebook friends nowadays. It's neither bad nor good, but I would recommend that they should only interact with people they trust.

These were the main aspects I wanted to cover analyzing Teen Social Networking & Stats.

Task 9.

1) exhibit

2) chair

3) school

4) test

5) homework.
