Task 7

Now many prefer to live in big cities.

I think it's so because large cities can offer lots of opportunities such as convenient conditions of living, various options of education and occupation. However there are some people who hate living there. Some reasons for this attitude: firstly, it's polluted air, connected with large number of industries, secondly, it's numerous population.

In my opinion there is no right ~~choice~~ variant ~~whether~~ to live between living in big cities or not. Everyone has free choice.

Task 8

Social Networks have become an essential part of teenager's life. Their life now is closely connected with the Internet. It's one of the reasons why they have lots of differences with previous generations.

I'm going to analyze a diagram, called "Teen Social Networking Stats" to understand if Social Networks have had influence at teenagers. Almost 100% of teens are social networks users. Approximately 40% of them use messagers to communicate with friends. It's a popular opinion that the Internet do lots of harm to teens and there is nothing positive in Social Networks. I don't agree with it. As for me, Social Networks can be a source of new acquaintances, useful information and some life hacks.

To sum up, the Internet and the Social Networks have already become unreplacable part of our life. I think it's just ^{the} fact to accept, that teen's life closely connected with them.
