Task 8.

It's so hard to not notice the difference between generations of teenagers. There were no smartphones during my parents' youth. They thought about other things, used their free time in other way.

My generation is absolutely not like the last one. We are spending 30% of our time using smartphones and computers. It takes the same time that we sleep! Why? Because smartphones

are multifunctional. We can read books, listen to music, do other things that our parents couldn't do when they were young. ~~but~~

Life became faster, things became more useful. But it means that the brain activity replace the physical activity. It is not a good sign because it can brace our health. That is why we should spend more time walking outside, doing exercises. Try to keep your ~~the~~ phone further and talk with your friends in real life more. Make unforgettable memories of your youth! Don't waste ~~the~~ time!
