Just when ~~demographers~~ ^{demographers} are ringing alarm bells about overpopulation Amazon founder Jeff Bezos says, "We need to populate our solar system." Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "It would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins... Space would be full of life and intelligence and energy." He said that he wants to help "build" heavy infrastructure that will be just by the space of future generations so that "ingenuity and imagination can really be unleashed".

Mister Bezos' thoughts are echoed by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter).

In 2021, he said of the human race: "We don't want to be one of those single-planet species; we want to be a multi-planet species." Earlier this year, Mister Musk warned that "population collapse due to low birth rates is a much bigger risk to civilization than global warming... Mark these words." Mister Bezos conceived of people living in giant space stations. He said most inhabitants of these would visit vacations. He envisions outer planet returning to its pristine environment, as factories would be built in space. He said ~~that would~~ they would exploit resources on the moon or asteroids instead of using up Earth.

When he got to the place, Jacob saw the last ticket being exchanged. He was in no position to change it: the counter's window was already closed shut. "Well," he thought, "in the end of the day, we must accept our fates..." He cuddled himself in a ball and started crying.

That's when the men in black saw him. He immediately recognized them — they were "The Bers". The group approached him and ~~said~~ "one of them said: 'You look dirty, man. Here. Take this.' The man handed Jacob ~~an~~ a behind-the-scene pass.
