Task 7.

Not everybody is ready to live in a countryside due to some difficulties. First, there isn't such infrastructure as in the city. There aren't as many entertainments and places for hanging out as in the city. In general, there is lack of medical workers and teachers, which can cause problems with health and education. For example, you won't have an ability to reach good hospital in a short amount of time. Another point is low salaries and lack of jobs.

Task 8.

By looking on the diagram we can conclude that the most part of teenagers spends time more on sleeping than doing other activities.

On the second place of daily activities are studying and eating. Others are equal (10%). ~~We're able~~ But why so?

I think teenagers're having lots of changes in their organisms

They're growing fast and their organism needs resources for this and time for relax. This can also explain the high level of eating.

Due to this teenagers just don't have enough time for other activities, which might cause troubles with ~~sufficient~~ socializing and keeping fit.

We all know that studying programmes at school are becoming more and more difficult and complicated. So it takes longer time to do the homework and there isn't enough amount of sleep. I guess we can make studying easier. Also we should start making sport fun and popular by organizing different clubs and competitions.
