~~Lastly, life in a big city is expensive. If you don't have much money, you simply can't live in such cities.~~

Task n9

1. museum

2. desk

3. school

4. exam

5. homework

~~Task n8~~

Task №7.

Firstly, a person can hate living in a big city because it's overcrowded. There are always lots of people in the streets, and they all are in a hurry - this rhythm of life is not for everybody.

Secondly, life in a big city is not so healthy as there is a lot of pollution from cars, planes, manufactures etc.

Lastly, life in a big city is expensive. If you don't have much money, you simply can't live in such cities.

Task n8.

The diagram given contains some useful statistics to understand how much teenagers use social networks. So, 73 percent of teens ~~are~~ are on social networks and 37 percent send messages to friends every day. These stats mean that social networks are very important for teens' online life.

One of the most popular social networking platforms for teens is Facebook. Only 8 percent of American teens use Twitter, ~~for more~~ ~~time~~ they spend far more time on Facebook: 22 percent of teens log on to Facebook more than 10 times a day! Also, an average teen has 201 Facebook friends. The platform is widely used by kids compared to all people - a quarter of Facebook users are under 10 years old!

In the conclusion, social networks are widely used nowadays. Children are trying to stay in trends and sign in there. But having too much online life can also affect teens' offline life, so it's really important to teach them how to regulate their screen time.
