Mister Bezos was asked for his views on humane

living in out of space in a Ozon this time. He replied: "I would love to see, you know, a trillion humans living in a solar system. If we had a trillion humans we would have at any given time 1,000 Mozarts and 1,000 Einsteins... space would be full of life and intelligence and energy". He added that he wants to ~~help~~ help "build heavy infrastructure that will be just by the space entrepreneurs of future generations... so that engineers and imagination can rely by on left."

Mister Bezos puts air scout by fellow multi-billioner Elon Musk, owner of X (formally known as Twitter). In 2021, he said of the human race: "we don't want to be one of the single planet; we want to be a multi-planet species".

Furthermore, mister Musk wants that: "population collapse due to low births is a massive risk to civilization than global warming... mask this way".

Mister Bezos can ~~see~~ ^{see} of people living in giant space stations. He said most inhabitants of this would visit the Veikfence. He envisions a planet replace to its previous environment as factories would be built in space. He said they would exploit resources on the moon ~~or~~ or on asteroids instead of just up surface.
